will be displayed on the next screen, tap ➡️.
The security Q/A set successfully. Tap ➡️.

The SETUP COMPLETE screen. On-screen message will say "Setup complete. Tap on the OK button and the Controller will reboot to finish applying settings."

Pairing
To pair your light(s) to the controller, select Pairing from the Home screen. The Pairing screen displays three options:
1.Pair new light; 2.Edit paired lights; 3.Home. Tap on "Pair new light". If there are lights currently paired with the
controller, a list of already paired Stable Lights will appear and begin a countdown timer (5min). If you are pairing
lights for the first time, this screen will be empty and the serial numbers of lights will appear when successfully
paired. To activate pairing mode on the Stable Light place the magnet near the sensor on the side of the Stable Light
beside the green LED light (sensor location is shown on the end cap using a symbol). The Stable Light will flash Red
to signify that it is in pairing mode and currently searching for a signal. When the Stable Light is successfully
connected the light will illuminate Red for 10 seconds and the Light will appear on the Controller.

Programs
To load a program, select Programs from the Home screen. On the Programs screen, you have two
main options: 1. Assign Program.; 2. Programmed List. You can assign a program to one or more lights.
To assign a program you must select an individual light by pressing the name on screen or select all
lights by selecting the 'select all' icon on the bottom left corner of the screen and tap ☑ .
Choose one of the listed programs*: Circannual, Short day, Long day, Reflect, Custom, Remove, tap ➡️.
Set Sunrise Time using the keypad, tap ➡️ and enter your Pin, tap ➡️. The screen will display
programms summary. Tap ➡️, Light(s) programmed successfully.

*FOR INFORMATION ON PROGRAM SELECTION PLEASE REVIEW THE STABLE LIGHT USER MANUAL.
